## INFORMATION FOR ORDERING ACTIVITIES

### SPECIAL NOTICE TO AGENCIES: SMALL BUSINESS PARTICIPATION

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service ([www.fss.gsa.gov](http://www.fss.gsa.gov)). The catalogs/pricelists, GSA Advantage!™ and the Federal Supply Service Home Page ([www.fss.gsa.gov](http://www.fss.gsa.gov)) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

## NEXTCONSTRUCT, INC. CORPORATE BACKGROUND

NextConstruct is an information technology (IT) company that specializes and has experience in solving business and technical problems through developing leading-edge solutions using state-of-the-art IT tools and technologies.

There is a paradigm shift taking place in information technology. Increasingly both commercial and government customers are dealing with shrinking IT budgets. The complexity of today's IT environments and the escalating cost of dealing with them, is putting a tremendous innovation squeeze on CIO's.

The President's goal of an Open Government prioritized by the Office of the Federal CIO through the five pillars of Transparency, Citizen Engagement, Lowering the Cost of Government Operations, Innovation and Safe Computing requires a fresh approach to IT solutions.

It will require a greater emphasis on shorter term program goals and increasingly, reliance on achieving performance objectives and seeking accountability from contractors via fixed price and performance based contracting.

This is particularly well suited for NextConstruct because we have led with a "less is more" philosophy.
